EDUCATION

Thakur College of Engineering and Technology

B.Tech., Artificial Intelligence and Machine Learning — CGPA: 8.23/10 (through Semester VI)

Sardar Vallabhbhai Patel Vidyalaya and Jr. College

Higher Secondary Certificate (Class XII) — 60.83%

Aug 2023 – May 2027

Mumbai, India

Jun 2021 – May 2023

Mumbai, India

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, C, C++, HTML, CSS, Solidity

Backend and Databases: FastAPI, REST APIs, WebSocket, Asynchronous Programming, MongoDB, SQL

Cloud and DevOps: Microsoft Azure, Azure Policy, Azure Firewall, VPN Gateway, Bicep, Infrastructure as Code (IaC), Role-Based Access Control (RBAC), Docker, CI/CD, GitHub Actions, Linux

Blockchain and ML: Hardhat, IPFS, PyTorch, XGBoost, SHAP

Observability and Operations: Logging, Monitoring, Debugging, Incident Management, Root Cause Analysis (RCA), ServiceNow (Basic)

Developer Tools: Git, GitHub, VS Code, Postman, Jupyter Notebook

PROJECTS

Blockchain-Based Patient Consent Management System — Secure & AI-Driven Health Data Access Platform

Aug 2026 – Present

Solidity, Hardhat, FastAPI, Python, React, IPFS, PyTorch, XGBoost, SHAP

- Designed and deployed 5 Solidity smart contracts enforcing purpose-bound, self-expiring patient consent on a permissioned blockchain, validated by 111+ automated tests with 96% code coverage.
- Built a FastAPI access-control gateway performing AES-256-GCM and ECIES envelope encryption, enabling cryptographically enforced consent revocation in under 1 millisecond.
- Engineered an unsupervised anomaly-detection pipeline (Isolation Forest + LSTM Autoencoder) achieving 5.6x higher detection accuracy (PR-AUC) than rule-based baselines across 80,000+ simulated access events.
- Developed an explainable XGBoost risk-scoring model with SHAP-based justifications for consent requests, reaching 99.9% ROC-AUC and reducing decision opacity for end users.

Cloud Incident Monitoring System

Jun 2026 – Aug 2026

Python, FastAPI, Docker, GitHub Actions, Microsoft Azure, MongoDB

- Developed REST APIs using FastAPI with centralized logging to monitor application health, system status, and error tracking.
- Built an automated CI/CD pipeline using GitHub Actions and containerized the application using Docker for consistent deployments.
- Simulated incident detection and Root Cause Analysis (RCA) using application logs and monitoring metrics stored in MongoDB.

ToxiGuard — Real-Time Backend Monitoring and Moderation Platform

Aug 2025 – Feb 2026

Python, FastAPI, MongoDB, WebSocket, VADER, CNN, OpenCV, Plotly Dash

- Built a multimodal (text/image/video) toxicity detection pipeline using toxic-BERT, VADER, and CLIP-based fusion scoring, deployed as a 5-service Dockerized system with async FastAPI + MongoDB.
- Designed a rule-based + XGBoost decision engine with SHAP/Grad-CAM explainability and an active-learning retrain loop driven by moderator feedback.
- Implemented WebSocket-based real-time feeds and a JWT-secured admin moderation queue across 4 integrated platforms (Twitter/X, LinkedIn, Reddit, Discord).
- Built Plotly Dash analytics dashboards for cross-platform toxicity trends and CSV reporting.

AzureGov — Enterprise Landing Zone and Governance Architecture

Mar 2026 – Jun 2026

Microsoft Azure, Bicep, Azure Policy, RBAC, Hub-Spoke Networking, Azure Firewall, VPN Gateway

- Deployed Azure infrastructure using Bicep Infrastructure as Code (IaC) templates.
- Configured Hub-Spoke networking with Azure Firewall and VPN Gateway for secure cloud connectivity.
- Implemented Azure Policy and RBAC for governance and secure resource access.
- Automated infrastructure provisioning following Infrastructure as Code best practices.

EXPERIENCE

Star Infrastructure Pvt. Ltd.

Dec 2025 – Feb 2026

Technical Intern — RCC Structure Drafting and Design

Mumbai, India

- Prepared and validated engineering documentation following organizational standards.
- Collaborated with engineers to identify and resolve drafting inconsistencies before release.
- Managed revision-controlled technical documentation and engineering records.

LEADERSHIP AND EXTRACURRICULAR

TCET ACM SIGAI Student Chapter

Jun 2024 – May 2026

Secretary (Jun 2025 – May 2026); Joint Secretary (Jun 2024 – May 2025)

Mumbai, India

- Coordinated technical events and collaborated with cross-functional teams to ensure smooth execution.
- Maintained project documentation, reports, and operational records across two committee terms.
- Managed task coordination and communication across committee members and student engagement programs.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional — Oracle

Data Science, Machine Learning, Deep Learning, Natural Language Processing Bootcamp — Udemy

SQL and Databases Bootcamp | Azure Solutions Architect | Power BI: Business Intelligence — Udemy
